## PROFESSIONAL PROFILE

---

Technology consultant, developer and business owner with over 25 years of experience across IT, project management and digital marketing. Founder and owner of LyberCode (formerly Montini Web Strategy), an IT consultancy specialising in the digital transformation of private companies and Italian public administration bodies.

Founder of Web Strategy, a practice dedicated to recovering existing corporate websites and making them readable and citable by AI answer engines (GEO — Generative Engine Optimization). Author of the non-fiction book «Invisibili all'Intelligenza Artificiale» (2026), which sets out in full the method applied to client projects.

Post-graduate training in front-end development and project management. Since 2020 focused on Cloud Computing and Artificial Intelligence as the core levers of business innovation, combining them with a long-standing web development background to deliver scalable, data-driven solutions. Member of the Google Cloud Innovators Plus Program.

Accredited supplier on MEPA, the Italian public administration e-marketplace, with experience in public tendering, AGID-compliant ICT contract monitoring and service delivery to institutional clients.

## CORE TECHNICAL SKILLS

---

**Cloud & Data** — Google Cloud Platform (GCP), BigQuery, Firebase, cloud application development, infrastructure migration and management, data analytics.

**AI & Automation** — Generative AI (Genkit, Vertex AI), RAG architectures, conversational chatbots, machine learning, business workflow automation, RPA for repetitive tasks, document intelligence.

**Web development** — JavaScript, React, Next.js, PHP, MySQL, Flutter, front-end UI frameworks, responsive design, progressive web apps, web accessibility (W3C WAI).

**GEO & content** — Generative Engine Optimization, Schema.org structured data, information architecture built on real customer questions, technical SEO, repeated measurement across answer engines.

**CMS & e-commerce** — ProcessWire, WordPress / WooCommerce, custom content management systems, e-commerce platforms and online shops.

**Design & digital marketing** — UX/UI design, web marketing campaigns, performance analysis, conversion and process optimisation.

**Management & governance** — ICT project management, KPI definition and monitoring, AGID-compliant ICT contract lifecycle oversight, digital dashboards, compliance audits, budgeting, multidisciplinary team coordination.

## PROFESSIONAL EXPERIENCE

---

### **Founder & Owner – Senior Web Developer — LyberCode (formerly Montini Web Strategy)**

January 2012 – Present · Rome & Terracina, Italy

IT consultancy delivering end-to-end digital transformation: custom software development, cloud computing, artificial intelligence, data analytics and ongoing technical support for businesses and public bodies. Rebranded from Montini Web Strategy to LyberCode in 2025 to strengthen its positioning as an innovation technology partner.

- Designed and delivered 55+ digital projects for clients across Italy and Switzerland, spanning real estate, tourism, professional services, architecture, culture, crafts, retail and public administration.
- Built custom web and mobile applications on ProcessWire, WordPress/WooCommerce, React and Flutter, plus bespoke e-commerce platforms and web apps.
- Led cloud adoption and migration projects on Google Cloud Platform, including BigQuery-based analytics pipelines and machine learning workloads.
- Delivered generative AI solutions: customer-facing chatbots, AI-assisted quotation systems and a RAG-based system for itemised waste tariff calculation.
- Coordinated project teams of 5–7 people on average (external professionals and project staff): skills planning, sourcing, role assignment, and continuous control of time, cost, quality and progress.
- Won two public tenders on MEPA in 2025: an Office suite and IT security training course for a public body, and the management of advanced web services and IT services for an institutional website.
- Applies an agile, structured methodology across the full lifecycle — needs analysis and planning, design and development, secure implementation and testing, then support, monitoring and continuous updates.

### **Founder – Front-end developer & GEO consultant — Web Strategy**

Ongoing · Rome, Italy

A practice specialising in recovering and transforming existing corporate websites, and in making them readable and citable by AI-based answer engines.

- Applies the GEO method set out in «Invisibili all'Intelligenza Artificiale» (2026): citability, identity consistency across public sources, information architecture driven by real customer questions, extractable writing, declared data.
- Front-end development in React and Next.js, with a focus on performance, accessibility and structured data.
- Diagnostic check-ups on existing websites, delivering a prioritised roadmap and ninety-day operational plans.
- Repeated measurement across answer engines and continuous maintenance of published content.

### **CEO's Staff — Ancitel S.p.A. (ANCI group)**

January 2008 – December 2011 · Rome, Italy

- Direct support to the Chief Executive Officer on planning and control activities.
- Member of the team responsible for preparing the company's forecast budget.
- Economic data analysis in support of strategic decision-making.

### **Technical Coordinator, Anci Servizi — National Association of Italian Municipalities (ANCI)**

January 2003 – December 2007 · Rome, Italy

- Operational coordination of the «Institutional support projects» area, covering local public services, inter-municipal associations, land registry and local welfare.
- Direct management of an internal technical staff of 15, plus external consultants and suppliers.
- Activity planning, prioritisation and progress control; accountable for deadlines and quality of deliverables in a structured institutional environment.

### **Project Manager — Formautonomie S.p.A. (formerly Anciform)**

January 2001 – December 2002 · Rome, Italy

- Managed organisational restructuring projects for large municipalities (Cagliari, Nuoro, Catanzaro).
- Coordinated three-person project teams and liaised with public sector managers and officials.
- EU project design and technical coordination of projects in the local public administration sector.

### **Second Lieutenant — Italian Army**

July 1992 – October 1995 · Montelibretti, Lazio, Italy

- Platoon commander, Centauro armoured vehicles (approx. 30 personnel): personnel management, training, shift planning and operational discipline.
- Instructor at the Cavalry Officer Cadet School of Montelibretti.

EDUCATION

**Post-graduate Master's in Project Management** — Sapienza University of Rome, Faculty of Economics  
2004–2006 · Specialisation: project management in public administration (programme taught in English)
